8. The instructor shows respect and concern for students.

9. The instructor evaluates student performance in a fair manner.

Instructor Questions: Comparative Scores (continued)

10. The instructor returns graded student work in a timely manner.

11. The instructor provides useful feedback on student work.

12. The instructor is an effective teacher.

What did your instructor do well in this course?

Comments
Dr. Girard did a good job engaging the class.
Was very enthusiastic about his job
Well, he brought in one interesting guest. The man he brought in to discuss cyber security, while his ideas were far too inconsistent, he explained them in an effective way and mentioned one or two things I did not know.
This class was an awesome experience... Our instructor was very knowledgeable on every level. He introduced us to various topics relating to I.T.
Bringing in guest speakers for the class to learn about all the concentrations
ALOT
Mr. Girard showed that he was enthuse to teach every chapter in class. He also went into different subject matters in IT, which was great.
covered a wide areas of IT
Very.
Everything
Presented group project early in the semester.
the group activity
He gives a great explanation for every assignment.
everything
He is very detailed in his lectures and his personal stories and enthusiasm add to the course very well.
He gave clear instructions for the course.
Introducing the world of IT

What changes would you suggest to make your instructor's teaching more effective?

Comments
Not so much Dr. Girards teaching more than the curriculum he has to teach. The curriculum is terrible.
Making learning the material more fun, showing examples of what's expected, being more student participation oriented.
Make the course curriculum at least somewhat related to the Internet Technology. We spent part of the class writing about the college library, studying abroad, job searching, etc. The only thing I learned from this class was from the next to last guest speaker, and what I learned was incredibly mundane.
No suggestions, He was very effective in the classroom.
Be more involved with the team project
NOT SURE
None
Give a little more structure for the group projects.
I feel that did not learn the material in class needed to effectively complete the team project. I would have liked more clear guidance. My team and I had to Google things that I feel we should have been learning from a textbook.
Nothing
The 10 Assignments having to be done as a group replace the whole point of the team projects preparation. Lessen the team projects and give the students more chances to meet on the 2nd class day to prepare for the team project. Additionally, with the current system, it is quite excessive for students to have to meet outside of class hours, including the Thursday time slot, for an introductory class to finish the team project. Furthermore, during lectures providing examples or doing some example work of our assignments would be better and more engaging with the class; however, we as students are simply listening to you talk about the chapter and a lot of people aren't interested in that.
less assignments
Best the way it is.
Less rambling
None
No changes.
The reading

If the instructor makes use of technology in the classroom, is that usage effective?

Comments
yes
Yes
Yes.
Very effective,,, We covered a lot of technical topics and discussions.
Yes
GOOD
Mr. Girard uses all his technology effectively.
Yes.
Yes
It is effective.
yes
yes, it helps alot.
Yes
Yes very
Yes highly effective
Yes it is effective because we are learning about the technology
